## EXPERIENCE

### ALX Africa , Physical — *trainee*

May 2022 - PRESENT

I am participating in AWS cloud, a 7-month program called ALX Kigali where we work as a team to develop real world projects using various technologies, including infrastructure components and emerging technologies like machine learning and internet of things.

### Nova services , Kigali city-Rwanda — *Networking trainer*

Feb 2019 - August 2019

I dedicated more than seven months to teaching and guiding secondary school students who were trainees in a networking program, covering subjects such as Routing, Switching, and Network maintenance.

## EDUCATION

### ACEJ KARAMA, Muhanda — *High school degree*

January 2017 - December 2019

In high school I pursued studies in computer networking, which enabled me to acquire various abilities such as routing, switching, and effective communication skills.

### National university of Rwanda , Huye Rwanda — *Bachelor's Degree*

April 2020 - July 2024

During my academic journey in Business Information Technology at the University, I acquired not only technical proficiency but also developed competencies in business management and accounting.

## PROJECTS

### Online bus ticket Reservation system

I created a digital platform called online reservation system, which provides users with the ability to reserve and purchase tickets for transportation through the internet.

## SKILLS

### Frontend technologies:
